

People's Park East-side forest was attacked by UC Berkeley. **Take Action Now** **Protect People's Park**

More than 22 trees were killed by UC Berkeley in an early morning sneak attack, which they called "Deferred Maintenance".

UC Berkeley cut at least 22 trees down, starting around 5:00 AM, Friday, December 28, 2018 in a sneak attack. The one page statement they showed protesters said about 41 trees were marked for removal. Park supporters were able to save some trees.

Park supporters are doing a vigil and camp out to protect remaining trees. Some are visibly marked with orange spray paint for killing. People are documenting the crime scene with photos and videos. Come and help protect the park from UCB developers.

Please help try to save these remaining beautiful trees, these beautiful living beings. We want them in our community, even if they are not perfect. They are conscious, just like we are.

These trees are beautiful, stately, elegant, good-natured, righteous, upstanding, lively, peaceful, cleansing, healing, thoughtful, intelligent, patient, calm, strong, enduring, wise.

Join us to save the park:
People's Park Committee meets
every Sunday, 1 PM in the park.
